

GABRIEL REYNOSO ROMERO

New York City, NY | (551) 3626937 | gabo.reyno@gmail.com | gabrielreynosoromero.com | linkedin.com/in/gabrielreynosorom

EDUCATION

STEVENS INSTITUTE OF TECHNOLOGY | Hoboken, NJ

December 2026

Master of Science in Data Science (4.0/4.0 GPA)

- Provost Master's Scholarship recipient: Awarded to exceptional master's degree students.
- Relevant Coursework: Calculus (*Teaching Assistant*), Deep Learning, Generative AI, Applied Machine Learning, Time Series Analysis, Optimization for Data Science, Big Data Analytics, Data Integration for BI and Statistical Methods.

ITAM (INSTITUTO TECNOLÓGICO AUTÓNOMO DE MÉXICO) | Mexico City, Mexico

June 2019

Bachelor of Science in Mechatronics Engineering (9.53/10)

Bachelor of Science in Industrial Engineering (9.49/10)

- Awards & honors: Best Thesis Award – Design and Implementation of a Heterogeneous Teleoperation System.

SKILLS

Programming	Python, SQL, Java, R, MATLAB, C/C++
DS/ML/AI	pandas, Jupyter, NumPy, scikit-learn, PyTorch, Keras, AI-Assisted Coding (Codex, Claude Code), Prompt Engineering.
Cloud & Data	Redshift, PostgreSQL, BigQuery, AWS (Glue, Lambda, S3), PySpark, dbt, Apache (Airflow, Iceberg), Jenkins, Git.
BI Tools	Power BI, Tableau, Dash, Excel, Alteryx
Languages	English (Fluent), Spanish (Native)

EXPERIENCE

KLAR | Mexico City, Mexico

Growth Analytics Senior Manager

January 2025 – August 2025

- Reported directly to the CMO and led analysts and Analytics Engineers, translating Growth, Finance, and Product requirements into data models and reporting systems.
- Deployed a scikit-learn referral-propensity model supporting personalized incentive policies; initial tests showed a 2-3 percentage point conversion uplift among newly acquired users.
- Built an AWS Glue/PySpark and dbt ETL framework processing 10M+ daily AppsFlyer and Xpend records from S3 into Redshift, improving attribution and campaign reporting.

Growth Analytics Manager

April 2023 – January 2025

- Owned Referral operations and automated campaign measurement, supporting 31.5K monthly referral-sourced account activations at approximately 25% of paid-channel CAC.
- Built daily user-level LTV models in dbt and Redshift, reconciled with Finance; insights informed funnel and Savings-adoption changes that helped more than double three-month LTV per acquired user.
- Analyzed BigQuery app events to identify onboarding drop-offs; recommended earlier phone-number collection and follow-up messaging, contributing to an approximately 10% increase in acquisition-funnel conversion.

Customer Engagement Senior Analyst

July 2022 – April 2023

- Built dbt credit-acquisition funnel models and Savings dashboards; automated Python/SQL reporting for engagement reviews and Finance balance and funding-cost metrics.

Customer Engagement Analyst

October 2021 – June 2022

- Automated Adjust attribution reporting with Python, SQL and Tableau; identified a 35 percentage point six-month retention difference between users making 6+ versus fewer than 3 first-month purchases.

FORD MOTOR COMPANY | Mexico City, Mexico

Data Analyst Engineer

March 2021 – October 2021

- Performed analytics engineering duties through Hadoop/Alteryx reporting, Python transformations, and a Dash dashboard adopted by a 35-person US warranty team.

BEN & FRANK | Mexico City, Mexico

Data Engineer / Analyst

September 2020 – January 2021

- Maintained Redshift analytics data and automated commercial reporting with Airflow, Python, and AWS Lambda; reconciled historical customer records during the migration to Odoo.

Business Intelligence Analyst

September 2019 – August 2020

- Delivered sales, customer-cohort, and repeat-purchase analytics through Power BI dashboards during expansion from approximately 12 to 24 stores; analyzed NPS comments using NLP to identify customer pain points.

PROJECTS

FIFA World Cup 2026 Forecasting: Built a probabilistic forecasting system combining a Dixon-Coles match model, LightGBM calibration, and Monte Carlo tournament simulation.

Traffic Optimization via Collective Intelligence: Compared greedy routing, marginal-cost assignment, and Q-learning with expert imitation on a Manhattan street network.
